# VARDEN SENTINEL

Automated cyber risk testing platform

The first accessible, **AI-powered cyber guardian** for organizations.

Like the ancient Vardens who  
watched the horizon before  
danger arrived,  
**SENTINEL** stands on the digital  
frontier detecting threats before  
they strike.

In an age where cyberattacks  
happen silently and instantly,  
visibility is power.

**MODERN GUARDIANS, ANCIENT SPIRIT**
